

Clean Air for Pets and Pet Owners Alike!

You hear every day about people being allergic to their pets, but pets can have allergies too! Does your pet have itchy, irritated skin? Does it get worse during allergy season? You may be surprised to find that you're not the only one in your home suffering from inhalation or seasonal allergies.

What does an Air Purifier do for pets?

With a powerful fan, the air purifier blows air through the pre-filter (which removes hair and large particles) and the HEPA filter which takes out more than 99.97% of pollens, dust, and mold particles. All those irritants and allergens which have been bothering your pet will be dramatically reduced.

How does it help pet owners?

With a massive activated carbon filter, this unit will absorb odor like a sponge. Place it near your pet's litter box or favorite resting spot and you will smell the difference. The HEPA filter will not only get rid of the allergens mentioned before (pollens, dust, and mold) but will also remove pet dander from the air. With this powerful filtration system, if dust, mold, pollen or even if your own pet is the cause of your allergies, these units can significantly improve your quality of life.

The Air Tube: A Viable Solution at the Right Price

- For localized odor, chemical, and particle control
- For pets, use next to a litter box or near where they sleep
- For pet owners, use it next to your bed or on your desk if you work in the home
- Easily portable: you can move it to wherever it is needed at any given time or even take it on the road when you travel!

Specifications

- 7 pounds MAC-B activated carbon
- Medical-Grade HEPA filter (99.97% effective at removing particles 0.3 microns in size)
- Pre-filter
- 100 CFM (cubic feet per minute) free flow

Full Room Air Purifiers

5000 Exec (optional UV)

- 18 lb MAC-B activated carbon filter
- Medical-Grade HEPA filter (99.97% effective at removing particles 0.3 microns in size)
- Pre-filter
- 400 CFM (cubic feet per minute) free flow
- Optional: Ultraviolet light to sterilize bacteria, viruses and mold. Especially useful for bird owners to stop the spread of disease.

5000 Vocarb

- 18 lbs of specially carbon formula for removing VOCs and ammonia
- Protects pets from chemicals (like carcinogenic formaldehyde) in new carpeting and upholstery
- Absorbs the odor from pet urine
- Medical-Grade HEPA filter
- 99.97% effective at removing particles 0.3 microns in size)
- 400 CFM (cubic feet per minute) free flow

5000 D

- 22 lbs of MAC-B activated carbon for additional odor and chemical control
- Micro-HEPA filter (95% effective at removing particles 0.5 microns in size)
- Pre-filter
- 400 CFM (cubic feet per minute) free flow
